

TASKS										COMPLETE		EXTERNAL RESOURCE		
Setup Workspace														
	Outlook; IT Time Tracking; Journalx; Tech Partners Timesheet; JIRA; Confluence; Request-it; Office Su									100%				
	Setup remote access									100%				
Setup Development Platform:														
	STS IDE; Oracle SQL Developer; Maven; JPA; Git; HipChat; Notepad++									100%				
	DB2 DBA Tool for AS/400 RDBMS									0%				
	Setup code repository for implementation phase in BitBucket									50%				
	Setup Jenkins for continuous build and testing									5%				
	Setup Artifactory for artifact storage									0%				
System Analysis and Design Tasks														
	Meetings with Architect to get understanding of the legacy system									100%		Ed		
	Meetings with Architect to get understanding of the proposed system									100%		Ed		
	Review legacy system design documentation									100%				
	Review proposed system design documentation									100%				
	Discuss changes to proposed system design with Architect									100%				
	Meetings with DBA to get understanding of database components									50%		Cara		
	Analyze PeopleSoft procedure code in .sqr and .sqc files									80%		Cara		
	Convert PeopleSoft procedure code into pseudocode									20%				
	Determine which data structures and design patterns to use for implementation									90%				
	Document System Analysis and Design													
		Update high-level architecture documents								100%				
		Create low-level architecture documents								100%				
		Create table describes for each PS table used								100%				
		Create dataflow diagrams for proposed system								100%				
		Create detailed design for Trigger Monitor component								90%				
		Create detailed design for Data Importer component								90%				
		Create detailed design for Data Translator component								90%				
		Create detailed design for Data Exporter component								90%				
	Create deployment strategy document									0%		?		
	Meetings with QA to get an understanding of user test requirements									0%				
	Create user test suite									0%		John		
	Determine if a test suite exists for the current system											?		
System Implementation Tasks														

	Create proof-of-concept Java application						100%				
	Create PS database server connection through Java						99%				
	Create AS/400 database server connection through Java						0%	Cathy or Carol			
	Create JPA entities for PS tables						5%				
	Create JPA entities for AS/400 tables						0%				
	Create CRUD methods for all tables						5%				
	Convert PeopleSoft pseudocode into Java code where appropriate						0%				
	Create unit test suite						2%				
	Create Trigger Monitor component						5%				
	Create Data Importer component						0%				
	Create Data Translator component						0%				
	Create Data Exporter component						0%
